

Report for pmsltech.com

Score: **87.9 %**

Generated on Thursday, November 3rd 2016 11:45 pm

This report provides analysis of the key factors that influence the SEO, performance, security and the usability of your website.

The score is based on a **100** points scale that represents your website's overall architecture, configuration and design. The algorithm is based on various criteria, including search engine data, website structure, site performance, and others.

A score lower than **40** means that there is a lot of areas to improve. A score above **70** is a good mark and it means that your website is probably well optimized.

Legend

	High score		Medium score		Low score		Info only
	social		backlinks		visitors		accessibility
	SEO-content		technology		validity		usability
	SEO		mobile		performance		SEO-Authority
	security						

Top Priorities

- Add custom 404 error page.
- Add text or image anchors to all links
- Fix CSS validation errors
- Add more keyword-rich quality content
- Add your Google+ page link to the website
- Submit your website to DMOZ directory
- Engage your fans on Facebook
- Verify your Facebook page account
- Eliminate render-blocking JavaScript and CSS in above-the-fold content
- Redirect IP address to domain name
- Verify your Google+ page account
- Leverage browser caching
- Minify HTML
- Disable server signature
- Consider obfuscating publicly accessible email addresses.

Social Media Indicators

Excellent, your social media presence is strong.

Facebook Mentions	98	Google™+ Mentions	150	Pinterest Mentions	0
LinkedIn Mentions	66	StumbleUpon Views	16	Reddit Mentions	0

High level of social activity increases domain authority and ability to rank higher, helps search engines to find and index new content in real-time, provides indicators for content authenticity and readers engagement.

Note: This data relates only to the websites URL and does not include specific brand pages.

Facebook

We have located following Facebook Page:

PMSL Technology

Internet | Software | Business Consultant
Bhubaneswar India

<https://www.facebook.com/PMSLTechnology>

PMSL Technology, is here to help you out all type website related issues having core areas of expertise on online marketing services like SEO, SMO, SEM, Link building and PPC management.

Facebook Likes:	908	Great, you have many fans liking your page.

Google+ is a popular interest-based social network. A well utilized Google+ account can help drive organic site visits and improve brand recognition. [About Google+ pages](#)

Traffic Rank

1,149,671 most visited website in the **World** Trend: ▲ up (-112,217)
 72,140 most visited website in **India**

Traffic Rank is provided by [Alexa](#)

Visitors Localization

Low High

Country	Percent	Domain (ccTLD)	Status
India	92.6%	pmsltech.in	Not available.

Registering country code top level domains (ccTLD) can prevent potential competitors from taking advantage of your primary domain reputation. It is also one of the ways to improve country specific SEO and performance. (<http://www.searchenginejournal.com/seo-without-boarders-a-guide-to-international-seo-nick-pateman/60092/>)

Images

Good, most images have ALT attribute.

Number of images: 30

Missing alt tag: 2

List of images with missing ALT attributes:

- <http://in.getclicky.com/100959009ns.gif>
- <//www.googleadservices.com/pagead/conversion/919006585/?label=NKkRCNm9jWoQ-d...t=0>

The "alt" attribute provides a text equivalent for the image. If the browser cannot display an image the alt description will be given in its place. Furthermore, some visitors cannot see images as they might be blind in which the alt tag provides a valuable image description. Finally, search engines utilize the alt attribute for image search indexing. (www.w3.org/QA/Tips/altAttribute)

Title

We have found following title:

"Website Design & Development | Android, iOS Application Development"

Length: 67 characters

The <TITLE> element provides a short piece of text describing the document. The title is very important as it shows in the window title bars, bookmarks and search results. Title should be between 60 to 80 characters long. (www.w3.org/QA/Tips/good-titles)

Description Metatag

 We have found following description:
"PMSLTECH offers PHP/WordPress Website Development, Custom CRM & CMS, Web and Mobile Application Development services in USA, UK, Australia & Canada."

Length: 148 characters

The description attribute should provide a concise explanation of a Web page's content. Also, the description is often displayed on search engine results and can affect page ranking. (en.wikipedia.org/wiki/Meta_element#The_description_attribute)

Keywords Metatag

 We have found **10** keywords:

- website development company
- ios application development
- wordpress development
- mobile application development
- PHP development
- internet marketing
- cms website development
- search engine optimization
- android application development
- social media marketing

Length: 258 characters

The keywords attribute was utilized by search engines to provide more accurate search results. Due to the over usage and spamming the keywords attribute has been phased out and is no longer relevant. Google doesn't use the "keywords" meta tag in web search ranking. (googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html)

Text to HTML Ratio

 The Text to HTML ratio is **18.06%**

Original content is by far the single most important element to search engines. Low Text to HTML ratio indicates little content for search engines to index. We consider it to be good practice to have a Text to HTML ratio of at least 10% and ideal above 20%

Keyword Density & Consistency

	Consistent	Keywords	Density	Count	Title	Description	H1-H6	ALT	Bold
	✓	development	5.15%	35	2	2	2	3	-
	✓	web	2.06%	14	-	1	1	1	-
	⚠	clients	1.91%	13	-	-	1	8	-
	⚠	happy	1.62%	11	-	-	1	8	-
	✓	website	1.47%	10	1	1	1	-	-
	✓	application	1.32%	9	1	1	-	2	-
	⚠	design	1.32%	9	1	-	-	-	-
	⚠	mobile	1.32%	9	-	1	1	-	-
	⚠	marketing	1.32%	9	-	-	1	-	-
	✗	more	1.18%	8	-	-	-	-	-

	⚠	happy clients	1.32%	9	-	-	1	-	-
	⚠	application development	0.59%	4	1	1	-	-	-
	⚠	website design	0.59%	4	1	-	-	-	-
	✗	wordpress development	0.59%	4	-	-	-	-	-
	⚠	mobile application	0.44%	3	-	1	-	-	-

	⚠	ios application development	0.29%	2	1	-	-	-	-
	✗	customized website design	0.29%	2	-	-	-	-	-
	✗	cross-platform mobile development	0.29%	2	-	-	-	-	-
	✗	shopping cart solutions	0.29%	2	-	-	-	-	-
	✗	social media marketing	0.29%	2	-	-	-	-	-

Keywords density and consistency are notable factors for optimal page SEO. Preferred keywords should have higher keywords density indicating their importance. Optimally, preferred keywords should also be consistently utilized in multiple essential areas of the page such as title, description meta tag, h1 through h6 headings, alt image attributes, backlinks and internal links anchor text. Keyword density of above 5% is a good indication that the word or phrase appears too many time in the content. ([more information](#))

Frames

No frames detected.

It is not recommended to use frames or iframes because they can cause problems for search engines. It is best to avoid frames and inline frames whenever possible (searchenginewatch.com/article/2064573/Search-Engines-and-Frames). If frames must be utilized consider <noframes> tag. (www.w3schools.com/tags/tag_noframes.asp).

Flash

No flash detected.

Flash and other reach-media technologies should primarily be utilized for decorative purposes. This makes your site more search engine friendly and improves accessibility (support.google.com/webmasters/bin/answer.py?hl=en&answer=72746#1).

Headings

- 1 <H1>
 - Who Are We ?

- 2 <H2>
 - Our Happy Clients
 - Quick Contact

- 7 <H3>
 - Amazing Features
 - Custom Web Applications
 - eCommerce Solutions
 - CMS Development
 - Website Development
 - Mobile Apps
 - Online Marketing

- 7 <H4>
 - We provide everything needed to get your business online.
 - Save 40% project cost.
 - Contact us for a free consultation..
 - We create products, platforms, campaigns, and branded content that connects enterprises w ith the community they serve. We bring culture and commerce together.
 - We Provide
 - Quick Links
 - New sletter

- 0 <H5>

- 0 <H6>

The <h1> to <h6> tags are used to define HTML headings. The <h1> tag should hold the title describing the content of a specific page therefore only one h1 tag is needed per page. There can be any number of h2 - h6 tags but they should be added in order of importance (www.w3schools.com/tags/tag_hn.asp).

Doctype

HTML 5

The <!DOCTYPE> declaration tells the web browser about what version of HTML the page is written in. It is good practice to always add the <!DOCTYPE> declaration to the HTML documents, so that the browser knows what type of document to expect. (www.w3schools.com/tags/tag_DOCTYPE.asp)

Character Encoding

- ✔ UTF-8 (Unicode)
Covers: Worldwide

To display an HTML page correctly, the browser must know what character-set to use (en.wikipedia.org/wiki/Character_encodings_in_HTML).

Language

- ✔ Declared Language: en (English)
Language Attribute: en (English)

The HTML "lang" attributes and language metatag define the base language to be used for displaying text and characters on a Website. www.mcanerin.com/en/articles/meta-language.asp

W3C Markup Validation

- ✔ Status: PASSED [0 errors, 0 warning(s)]

It is good practice to use valid HTML/XHTML markup as it ensures that the search engines can read the website correctly as well as it improves cross browser compatibility ([W3C Markup Validation Service](https://www.w3.org/MarkUpValidation/)).

Deprecated HTML elements

- ✔ Good, no deprecated elements found.

A deprecated element is one that has been outdated by newer constructs. Deprecated elements may become obsolete in future versions of HTML so it is recommended not to use them. (webdesign.about.com/od/htmltags/a/bltags_deprctag.htm)

Nested HTML Tables

- ✔ Great, no nested tables detected.

In general it is not recommended to use nested tables or to utilize tables for page layout. Nested tables are known to cause performance issues due to increased HTML size and rendering time. It is better to use [CSS layout](#) instead.

Web Analytics

- ✔ Yes, we have detected following web analytics tools:
 - Google™ Analytics
 - StatCounter
 - Facebook Pixel

Web Analytics Tools collect and measure information about visitor activity on a website. Well interpreted web traffic data is invaluable in determining a successfully web strategy and assessing the effectiveness of a website. At a minimum, we recommend to utilize at least one web analytics tool.

robots.txt

Yes, <http://pmsltech.com/robots.txt>

A robots.txt file restricts access to your site by search engine robots that crawl the web. (www.robotstxt.org/robotstxt.html)

XML Sitemap

Found following XML sitemap(s):

- <http://pmsltech.com/sitemap.xml>

Sitemaps inform search engines about pages available for crawling. In its simplest form, a Sitemap is an XML file that lists URLs for a site along with additional metadata about each URL. XML sitemap should help search engines to crawl the site more intelligently.

(<http://www.sitemaps.org/protocol.html>)

Mobile Rendering

Mobile internet usage has been exceeding PC's since 2014 and growing so it is critical for pages to render correctly on mobile devices.

Mobile Optimization

✓ Google Mobile Page Speed score: **90%**(High)

Requests	Hosts	Load time	Html	Images	JavaScript	CSS	Flash	Other	Page Size
70	14	2.98s	95.76 KB	1.18 MB	580.01 KB	305 KB	0 B	6.44 KB	2.14 MB

Recommendation	Impact
✓ Avoid landing page redirects	None
✓ Enable compression	None
✓ Leverage browser caching	Low
✓ Reduce server response time	None
✓ Minify CSS	None
✓ Minify HTML	Low
✓ Minify JavaScript	None
✗ Eliminate render-blocking JavaScript and CSS in above-the-fold content	Medium
✓ Optimize images	None
✓ Prioritize visible content	None

Mobile PageSpeed analyzes webpages and evaluates its performance while providing suggestions on reducing page load times. Google is incorporating website speed in search ranking (<http://www.matcutts.com/blog/site-speed>)

Mobile Experience

✓ Mobile User Experience: **100%**(High)

- ✓ **Avoid plugins** - Your page does not appear to use plugins, which would prevent content from being usable on many platforms.
- ✓ **Configure the viewport** - Your page specifies a viewport matching the device's size, which allows it to render properly on all devices.
- ✓ **Size content to viewport** - The contents of your page fit within the viewport.
- ✓ **Size tap targets appropriately** - All of your page's links/buttons are large enough for a user to easily tap on a touchscreen.
- ✓ **Use legible font sizes** - The text on your page is legible.
- ✓ **Mobile Page Speed** - Great, your page speed is **fast** on mobile devices.

Mobile users have now become a critical part of online visits. Making the website mobile friendly is no longer an option but rather necessity. (<https://developers.google.com/webmasters/smartphone-sites/>)

Favicon

✓  file: <http://pmsltech.com/images/favicon.png>
size: 32px by 32px
type: image/png

The Favicon is a small icon associated with a website. The Favicon is important because it is displayed next to the website's URL in the address bar of the browser as well as in bookmarks and shortcuts. (en.wikipedia.org/wiki/Favicon)

Custom 404 Error Page

No custom 404 error page detected.

Warning: Soft 404 error detected redirecting to <https://pmsltech.com/404error>.

A404 is a standard http response code for a resource that cannot be located on the server. Webservers usually return a "404 Not Found" error page for non-existing pages. Unfortunately, these default error pages are very generic and a not very user friendly, therefore, using a custom 404 error page is highly recommended.

Process of returning http status code "200 OK" for a non-existent page or redirecting users to another url is called soft 404. Soft 404 errors are problematic for search engines and are not advisable. (<https://support.google.com/webmasters/answer/181708>)

Printability

Great, you are using print-friendly CSS:

- <https://pmsltech.com/bootstrap/css/bootstrap.css>

Print-friendly pages are designed to fit on an 8.5"x11" or A4 sheet and usually include only the content of the page, along with source information. (webdesign.about.com/od/printerfriendly/a/aa041403a.htm)

W3C CSS Validation

Status: **FAILED** [137 error(s)]

It is recommended to use valid CSS to ensure that the website displays correctly. ([W3C CSS Validation Service](#)).

DMOZ

Not Listed

DMOZ the Open Directory Project is the most comprehensive human edited directory of the Web, compiled by a vast global community of volunteer editors. (www.dmoz.org/help/geninfo.html)

Domain Age

Your domain was registered for the first time: 6 years, 3 months, 11 days ago.

Age of the domain is one of the many signals that search engines utilize for ranking. Brand new domains generally have more difficult time to rank high for the first few months. (<http://www.coconutheadphones.com/does-domain-agematter>)

Domain Expiration

Your domain expires in: 1 year, 8 months, 19 days.

Domain expiration far in to the future is considered a good practice as it promotes confidence in your website, decreases chances of losing domain and in certain cases might help with search engine ranking. (<http://www.hover.com/blog/three-reasons-to-renew-your-domain-names-for-five-years>)

Links

We found a total of **107** links out of which **42** are duplicate links:

Internal Links: relative	Internal Links: absolute	External Links: noFollow	External Links: passing Juice	Other
7 (6.54%)	95 (88.79%)	0 (0.00%)	5 (4.67%)	0

Anchor(s)	Count	Title	URL	Length	Target	Rel	Type	
About Us	2	-	Static	29	-	-	Absolute	
Join Us	2	-	Static	28	-	-	Absolute	
Business References	4	-	Static	31	-	-	Absolute	
Services +	2	-	Static	29	-	-	Absolute	
Mobile Application	3	-	Static	32	-	-	Absolute	
iOS Development	2	-	Static	36	-	-	Absolute	
Android Development	2	-	Static	40	-	-	Absolute	
Cross-Platform Mobile Development	2	-	Static	54	-	-	Absolute	
Web Application	3	-	Static	48	-	-	Absolute	
Ecommerce Solutions	3	-	Static	40	-	-	Absolute	
OsCommerce	2	-	Static	43	-	-	Absolute	
Magento Development	2	-	Static	40	-	-	Absolute	
Shopify Development	2	-	Static	28	-	-	Absolute	
Prestashop Development	2	-	Static	31	-	-	Absolute	
Shopping Cart Solutions	2	-	Static	44	-	-	Absolute	

Hyperlinks are an integral part of any website and properly linked content has great impact on the SEO. It is a good practice to keep number of unique links below 100, URLs preferably as short and concise as possible and utilize nofollow attribute to control PageRank flow passed through links.

Broken Links

Good, No broken links found.

Broken or dead links can negatively impact user experience, search engine crawl rate and website traffic.

IP Canonicalization

No, your site's IP [162.215.252.57](#) redirects to [162.215.252.57](#) instead of [pmsltech.com](#).

Some web spiders index websites using IP as well as domain name which can cause duplicate content if there is no IP Canonicalization. (www.matcutts.com/blog/seo-advice-url-canonicalization)

URL Canonicalization

✓ Yes, both the www.pmsltech.com and pmsltech.com resolve to the same URL.

Domain name with WWW and without can be considered as different pages causing duplicate content for search engines. (www.matcutts.com/blog/seo-advice-url-canonicalization)

Page Speed

✓ Google Page Speed score: **96%**(High)

Requests	Hosts	Load time	Html	Images	JavaScript	CSS	Flash	Other	Page Size
69	13	2.56s	95.36 KB	1.18 MB	580.01 KB	305.17 KB	0 B	6.03 KB	2.14 MB

Recommendation

Impact

✓ Avoid landing page redirects	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Enable compression	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Leverage browser caching	<div style="width: 100%;"><div style="width: 100%;"></div></div>	Low
✓ Reduce server response time	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Minify CSS	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Minify HTML	<div style="width: 100%;"><div style="width: 100%;"></div></div>	Low
✓ Minify JavaScript	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Eliminate render-blocking JavaScript and CSS in above-the-fold content	<div style="width: 100%;"><div style="width: 100%;"></div></div>	Low
✓ Optimize images	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None
✓ Prioritize visible content	<div style="width: 100%;"><div style="width: 100%;"></div></div>	None

PageSpeed analyzes webpages and evaluates its performance while providing suggestions on reducing page load times. Google is now incorporating website speed in search ranking (<http://www.matcutts.com/blog/site-speed>)

Server Information

ISP: Unified Layer
Server IP: 162.215.252.57
Server Location: 🇺🇸 UTAH, Provo

Name Server 1: ns1.bh-60.webhostbox.net (207.174.213.126)
Name Server 2: ns2.bh-60.webhostbox.net (207.174.213.126)

Your server's IP address and location have minor impact on the country specific SEO. It is recommend to host the website in the country where the number of vistors is desired to be the highest. Search engines take the geolocation of a server into account. (<http://www.youtube.com/watch?v=hXt23AXIJJU>)

HTTPS (SSL)

Issued To:

Common Name (CN): pmsltech.com

Issuer:

Common Name (CN): Go Daddy Secure Certificate Authority - G2

Organization (O): GoDaddy.com, Inc.

Organizational Unit (OU): <http://certs.godaddy.com/repository/>

Period of Validity

Begins On: 01/28/2016

Expires On: 01/28/2017

Google™ is now treating HTTPS as a ranking signal. HTTPS is a secure web protocol that allows for encrypted communication between website and the client. HTTPS protocol requires your website to have an SSL certificate, which can be purchased from a Certificate Authority (CA) or SSL vendor. (http://googleonlinesecurity.blogspot.in/2014/08/https-as-ranking-signal_6.html).

Safe Browsing

Yes

Safe Browsing is a service provided by Google that enables applications to check URLs against Google's constantly updated lists of suspected phishing and malware pages. (<http://www.google.com/safebrowsing/diagnostic?site=>)

Spam Blacklist

Good, your IP is not blacklisted.

Spammer directories provide lists of IPs from which spam distribution is reported. Emails sent from the blocked IPs are subject to closer scrutiny and are much less likely to be delivered. For email campaigns it is recommended to utilize professional email services to ensure that your website IP is not blocked. (www.stopforumspam.com)

Email Address Obfuscation

There are 2 emails in plain text on the webpage:

- jane.doe@example.com
- info@pmsltech.com

It is recommended to obfuscate email addresses posted in public. This prevents email addresses from being automatically harvested by spam bots which helps to decrease number of unsolicited emails.

Directory Browsing

Great, your server has directory browsing disabled.

Protect Webserver directories from unwanted browsing. To enhance security, directory browsing should be disabled unless you have a specific reason to enable it. If you enable directory browsing, make sure that you only enable it on the particular directory or directories that you want to share. (<http://technet.microsoft.com/en-us/library/cc731109>)

Whois Privacy

No contact information available.

Whois Privacy is a service that prevents domain owner contact information from being displayed in the publicly available Whois records. This can help to cut down on unwanted spam but utilizing Whois privacy should be evaluated against business model and branding strategy.

Server Signature

On, Apache Phusion_Passenger/4.0.10 mod_bwlimited/1.4 mod_fcgid/2.3.9

Attackers can utilize server signature versioning information to their advantage therefore it is recommended to disable it when possible. (Disable server signature for [Apache](#) or [IIS](#)).
