It is also one of the ways to improve country specific SEO and performance. (<http://www.searchenginejournal.com/seo-without-boarders-a-guide-to-international-seo-nick-paterman/60092/>)

Images

Perfect, all images have ALT attribute.

Number of images: 24

Missing alt tag: 0

The "alt" attribute provides a text equivalent for the image. If the browser cannot display an image the alt description will be given in its place. Furthermore, some visitors cannot see images as they might be blind in which the alt tag provides a valuable image description. Finally, search engines utilize the alt attribute for image search indexing. (www.w3.org/QA/Tips/altAttribute)

Title

We have found following title:

"Surbiton Taxis-Cab Office|Cars-Mini Cabs-Taxi|Airport Transfers Service-London"

Length: 78 characters

The <TITLE> element provides a short piece of text describing the document. The title is very important as it shows in the window title bars, bookmarks and search results. Title should be between 60 to 80 characters long. (www.w3.org/QATips/good-titles)

Description Metatag

We have found following description:

"Dial 02083903030-book finest Surbiton mini cab , cheap car facility, 24 hours taxi service, best taxis firm-mini cabs service-reliable minicabs company-Surrey"

Length: 157 characters

The description attribute should provide a concise explanation of a Web page's content. Also, the description is often displayed on search engine results and can affect page ranking. (en.wikipedia.org/wiki/Meta_element#The_description_attribute)

Keywords Metatag

We have found **18** keywords:

- Taxis
- cars
- cabs
- Surrey
- taxi
- cab
- minicab
- car
- minicabs
- services
- Surbiton
- transport
- London airports
- Heathrow
- Gatwick
- Stansted
- Luton
- London City

Length: 141 characters

The keywords attribute was utilized by search engines to provide more accurate search results. Due to the over usage and spamming the keywords attribute has been phased out and is no longer relevant. Google doesn't use the "keywords" meta tag in web search ranking. (googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html)

Text to HTML Ratio

The Text to HTML ratio is **19.96%**

Original content is by far the single most important element to search engines. Low Text to HTML ratio indicates little content for search engines to index. We consider it to be good practice to have a Text to HTML ratio of at least 10% and ideal above 20%

Keywords density and consistency are notable factors for optimal page SEO. Preferred keywords should have higher keywords density indicating their importance. Optimally, preferred keywords should also be consistently utilized in multiple essential areas of the page such as title, description meta tag, h1 through h6 headings, alt image attributes, backlinks and internal links anchor text. Keyword density of above 5% is a good indication that the word or phrase appears too many time in the content. ([more information](#))

No frames detected.

It is not recommended to use frames or iframes because they can cause problems for search engines. It is best to avoid frames and inline frames whenever possible (searchenginewatch.com/article/2064573/Search-Engines-and-Frames). If frames must be utilized consider <noframes> tag. (www.w3schools.com/tags/tag_noframes.asp).

Custom 404 Error Page

Yes, custom 404 error page detected.

A404 is a standard http response code for a resource that cannot be located on the server. Webservers usually return a "404 Not Found" error page for non-existing pages. Unfortunately, these default error pages are very generic and a not very user friendly, therefore, using a custom 404 error page is highly recommended.

Process of returning http status code "200 OK" for a non-existent page or redirecting users to another url is called soft 404. Soft 404 errors are problematic for search engines and are not advisable. (<https://support.google.com/webmasters/answer/181708>)

Printability

Could not locate print-friendly CSS.

Print-friendly pages are designed to fit on an 8.5"x11" or A4 sheet and usually include only the content of the page, along with source information. (webdesign.about.com/od/printerfriendly/a/aa041403a.htm)

W3C CSS Validation

Domain Age

Your domain was registered for the first time: 6 years, 2 months, 7 days ago.

Age of the domain is one of the many signals that search engines utilize for ranking. Brand new domains generally have more difficult time to rank high for the first few months. (<http://www.coconutheadphones.com/does-domain-age-matter>)

Domain Expiration

Your domain expires in: 2 years, 9 months, 22 days.

Domain expiration far in to the future is considered a good practice as it promotes confidence in your website, decreases chances of losing domain and in certain cases might help with search engine ranking. (<http://www.hover.com/blog/three-reasons-to-renew-your-domain-names-for-five-years>)

IP Canonicalization

Yes, your site's IP [88.208.209.54](#) redirects to [www.stationcarssurbiton.com](#).

URL Canonicalization

Yes, both the [www.stationcarssurbiton.com](#) and [stationcarssurbiton.com](#) resolve to the same URL.

Domain name with WWW and without can be considered as different pages causing duplicate content for search engines. ([www.matcutts.com/blog/seo-advice-url-canonicalization](#))

Server Information

Server IP: 88.208.209.54
Server Location: GLOUCESTERSHIRE, Gloucester
Name Server 1: ns.123-reg.co.uk (212.67.202.2)
Name Server 2: ns2.123-reg.co.uk (92.51.159.40)

(http://googleonlinesecurity.blogspot.in/2014/08/https-as-ranking-signal_6.html).

Safe Browsing

Yes

Safe Browsing is a service provided by Google that enables applications to check URLs against Google's constantly updated lists of suspected phishing and malware pages. (<http://www.google.com/safebrowsing/diagnostic?site=>)

Spam Blacklist

Good, your IP is not blacklisted.

Spammer directories provide lists of IPs from which spam distribution is reported. Emails sent from the blocked IPs are subject to closer scrutiny and are much less likely to be delivered. For email campaigns it is recommended to utilize professional email services to ensure that your website IP is not blocked. (www.stopforumspam.com)

Email Address Obfuscation

Great, this webpage does not contain email addresses displayed in plain text.

It is recommended to obfuscate email addresses posted in public. This prevents email addresses from being automatically harvested by spam bots which helps to decrease number of unsolicited emails.

Directory Browsing

Great, your server has directory browsing disabled.

Protect Webserver directories from unwanted browsing. To enhance security, directory browsing should be disabled unless you have a specific reason to enable it. If you enable directory browsing, make sure that you only enable it on the particular directory or directories that you want to share. (<http://technet.microsoft.com/en-us/library/cc731109>)
