## Images

We have located images with missing ALT attribute.

**Number of images:** 11

**Missing alt tag:** 5

**List of images with missing ALT attributes:**

- /assets/images/men-coach.png (2 locations)
- /assets/images/loader/preloader.gif
- /assets/images/youtube.png
- [//googleads.g.doubleclick.net/pagead/viewthroughconversion/980575125/?value=...t=0](http://googleads.g.doubleclick.net/pagead/viewthroughconversion/980575125/?value=...t=0)

The "alt" attribute provides a text equivalent for the image. If the browser cannot display an image the alt description will be given in its place. Furthermore, some visitors cannot see images as they might be blind in which the alt tag provides a valuable image description. Finally, search engines utilize the alt attribute for image search indexing. ([www.w3.org/QA/Tips/altAttribute](http://www.w3.org/QA/Tips/altAttribute))

## Title

We have found following title:

*"CIBIL Score, Free Equifax & Credit Score, Apply for Loans and Credit Card Online"*

**Length:** 80 characters

The <TITLE> element provides a short piece of text describing the document. The title is very important as it shows in the window title bars, bookmarks and search results. Title should be between 60 to 80 characters long. ([www.w3.org/QA/Tips/good-titles](http://www.w3.org/QA/Tips/good-titles))

## Description Metatag

-  We have found following description:
- "Check Free CIBIL & Credit Score online, Improve Your Credit Score, Apply for loans, Credit Card, Reduce EMI, Get Action Plan Based on Credit Report in India."*

**Length:** 157 characters

The description attribute should provide a concise explanation of a Web page's content. Also, the description is often displayed on search engine results and can affect page ranking. ([en.wikipedia.org/wiki/Meta\\_element#The\\_description\\_attribute](https://en.wikipedia.org/wiki/Meta_element#The_description_attribute))

## Keywords Metatag

-  We have found **7** keywords:
- Free CIBIL Score
  - Credit Score
  - Equifax Score online
  - CIBIL Report analysis
  - Apply loans
  - Credit cards India
  - Reduce EMI

**Length:** 120 characters

The keywords attribute was utilized by search engines to provide more accurate search results. Due to the over usage and spamming the keywords attribute has been phased out and is no longer relevant. Google doesn't use the "keywords" meta tag in web search ranking. ([googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html](http://googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html))

## Text to HTML Ratio

-  The Text to HTML ratio is **29.23%**

Original content is by far the single most important element to search engines. Low Text to HTML ratio indicates little content for search engines to index. We consider it to be good practice to have a Text to HTML ratio of at least 10% and ideal above 20%

## Keyword Density & Consistency

	✗	mobile number verification	0.18%	4	-	-	-	-	-
	✗	loan emi calculator	0.18%	4	-	-	-	-	-

Keywords density and consistency are notable factors for optimal page SEO. Preferred keywords should have higher keywords density indicating their importance. Optimally, preferred keywords should also be consistently utilized in multiple essential areas of the page such as title, description meta tag, h1 through h6 headings, alt image attributes, backlinks and internal links anchor text. Keyword density of above 5% is a good indication that the word or phrase appears too many time in the content. ([more information](#))

## Frames

Yes, 1 inline frame(s) detected.

It is not recommended to use frames or iframes because they can cause problems for search engines. It is best to avoid frames and inline frames whenever possible ([searchenginewatch.com/article/2064573/Search-Engines-and-Frames](http://searchenginewatch.com/article/2064573/Search-Engines-and-Frames)). If frames must be utilized consider <noframes> tag. ([www.w3schools.com/tags/tag\\_noframes.asp](http://www.w3schools.com/tags/tag_noframes.asp)).

## Flash

No flash detected.

Flash and other reach-media technologies should primarily be utilized for decorative purposes. This makes your site more search engine friendly and improves accessibility ([support.google.com/webmasters/bin/answer.py?hl=en&answer=72746#1](https://support.google.com/webmasters/bin/answer.py?hl=en&answer=72746#1)).

## Custom 404 Error Page

Yes, custom 404 error page detected.

A404 is a standard http response code for a resource that cannot be located on the server. Webservers usually return a "404 Not Found" error page for non-existing pages. Unfortunately, these default error pages are very generic and a not very user friendly, therefore, using a custom 404 error page is highly recommended.

Process of returning http status code "200 OK" for a non-existent page or redirecting users to another url is called soft 404. Soft 404 errors are problematic for search engines and are not advisable. (<https://support.google.com/webmasters/answer/181708>)

## Domain Expiration

Your domain expires in: 2 years, 2 months, 15 days.

Domain expiration far in to the future is considered a good practice as it promotes confidence in your website, decreases chances of losing domain and in certain cases might help with search engine ranking. (<http://www.hover.com/blog/three-reasons-to-renew-your-domain-names-for-five-years>)
