

## Report for zenoti.com

Score: **89.1 %**

Generated on Monday, December 30th 2019 11:40 am

This report provides analysis of the key factors that influence the SEO, performance, security and the usability of your website.

The score is based on a **100** points scale that represents your website's overall architecture, configuration and design. The algorithm is based on various criteria, including search engine data, website structure, site performance, and others.

A score lower than **40** means that there is a lot of areas to improve. A score above **70** is a good mark and it means that your website is probably well optimized.

### Legend

	High score		Medium score		Low score		Info only
	social		backlinks		visitors		accessibility
	SEO-content		technology		validity		usability
	SEO		mobile		performance		SEO-Authority
	security						

## Top Priorities

- Fix HTML validation errors
- Add text or image anchors to all links
- Eliminate render-blocking JavaScript and CSS in above-the-fold content
- Fix CSS validation errors
- Add more keyword-rich quality content
- Leverage browser caching
- Optimize your website for mobile devices
- Add Hi-Resolution 192x192px icon for Chrome for Android
- Optimize images
- Fix WCAG 2.0 Accessibility Errors
- Enable compression
- Minify HTML
- Minify JavaScript
- Consider not using iframes
- Add printer-friendly CSS

## Social Media Indicators

Excellent, your social media presence is strong.

Facebook Mentions

1,899

Twitter Recent Mentions

7

Pinterest Mentions

1

Reddit Mentions

0

High level of social activity increases domain authority and ability to rank higher, helps search engines to find and index new content in real-time, provides indicators for content authenticity and readers engagement.

Note: This data relates only to the websites URL and does not include specific brand pages.

## Facebook

We have located following Facebook Page:

**Zenoti**

Mercer Island, Washington

<https://www.facebook.com/gozenoti/>

Zenoti, Mercer Island, Washington. 3,267 likes · 72 talking about this · 13 were here. The easiest software you'll ever use to manage and grow your business.

Facebook Likes:

3,267

Great, you have many fans liking your page.

Talking about this:

72

Excellent, it appears that people are engaged with your content.

Were here:

13

Great, some users "Checked In" at your physical location.

Facebook Page Vanity URL:

Yes

Perfect, your Facebook Page has vanity url.

Linking to Facebook Page:

Yes

Good, your homepage is linking to your Facebook Page.

Verified Facebook Account:

Yes

Your Facebook Page account is verified.

Facebook is the largest and most popular social networking website. A well utilized Facebook page can increase your visibility online, improve your real-time search engine optimization, and provide your visitors with a venue to connect and promote your brand.

<https://www.facebook.com/business/build>

## Twitter™

We have located following Twitter™ account:

Zenoti  
[@gozenoti](#)  
Bellevue, WA

<b>Description:</b>	Zenoti is an all-in-one cloud-based #software solution for #spas, #salons, medical spas and more. It's everything you need to grow your #business. <b>Length:</b> 151 characters.	✓
<b>Tweets:</b>	864 - Excellent, you have many tweets.	✓
<b>Followers:</b>	974 - Great, you have many followers.	✓
<b>Following:</b>	585 - Good, you are following some users.	✓
<b>Page Link:</b>	Yes, your homepage is linking to your Twitter™ account.	✓
<b>Verified:</b>	No, your account has not been verified by Twitter™	✗
<b>Account Age:</b>	7 years, 9 months, 1 day, 23 hours	✓
<b>Last Tweet:</b>	4 hours, 34 minutes ago.	✓

Twitter is a very popular social networking and micro-blogging service that when utilized correctly can significantly increase your brand awareness, promote your products and services, boost traffic to your website and help to connect with visitors. <https://twitter.com/about>

## Traffic Rank

**22,691st** most visited website in the **World**  
**141st** most visited website in **South Africa**  
**18,250th** most visited website in **United States**  
**25,344th** most visited website in **India**

**Trend:** ▲ up (-)

Traffic Rank is provided by [Alexa](#)

## Visitors Localization

No data available.

Registering country code top level domains (ccTLD) can prevent potential competitors from taking advantage of your primary domain reputation. It is also one of the ways to improve country specific SEO and performance. (<http://www.searchenginejournal.com/seo-without-boarders-a-guide-to-international-seo-nick-pateman/60092/>)

## Images

Perfect, all images have ALT attribute.

**Number of images:** 1

**Missing alt tag:** 0

The "alt" attribute provides a text equivalent for the image. If the browser cannot display an image the alt description will be given in its place. Furthermore, some visitors cannot see images as they might be blind in which the alt tag provides a valuable image description. Finally, search engines utilize the alt attribute for image search indexing. ([www.w3.org/QA/Tips/altAttribute](http://www.w3.org/QA/Tips/altAttribute))

## Title

We have found following title:

*"Salon Software | Spa Software | Hair Salon Software | Zenoti"*

**Length:** 60 characters

The <TITLE> element provides a short piece of text describing the document. The title is very important as it shows in the window title bars, bookmarks and search results. Title should be between 60 to 80 characters long. ([www.w3.org/QA/Tips/good-titles](http://www.w3.org/QA/Tips/good-titles))

## Description Metatag

We have found following description:

*"Zenoti is the most advanced cloud-based, business software for spas, salons, and medi-spas. Trusted by 5,000+ spas and salons across the world."*

**Length:** 143 characters

The description attribute should provide a concise explanation of a Web page's content. Also, the description is often displayed on search engine results and can affect page ranking. ([en.wikipedia.org/wiki/Meta\\_element#The\\_description\\_attribute](http://en.wikipedia.org/wiki/Meta_element#The_description_attribute))

## Keywords Metatag

We have found **48** keywords:

- |                             |                        |
|-----------------------------|------------------------|
| ■ salon software            | ■ appointment schedule |
| ■ spa software              | ■ appointment manager  |
| ■ beauty software           | ■ booking app          |
| ■ salon app                 | ■ nail software        |
| ■ hair salon software       | ■ uk                   |
| ■ best salon software       | ■ us                   |
| ■ Salon system              | ■ australia            |
| ■ Spa system                | ■ south africa         |
| ■ Appointment Scheduling    | ■ best                 |
| ■ salon program             | ■ salon                |
| ■ salon iris                | ■ spa                  |
| ■ mindbody                  | ■ hair                 |
| ■ booking software          | ■ nail salon           |
| ■ system                    | ■ beauty               |
| ■ appointment system        | ■ appointment          |
| ■ scheduling software       | ■ yoga                 |
| ■ online booking            | ■ free                 |
| ■ salon program             | ■ best                 |
| ■ salon management software | ■ point of sale        |
| ■ pos                       | ■ calendar system      |
| ■ crm                       | ■ calendar             |
| ■ free booking system       | ■ reminders            |
| ■ salon programs            | ■ salon supplies       |
| ■ scheduling applications   | ■ salon management     |

**Length:** 649 characters

The keywords attribute was utilized by search engines to provide more accurate search results. Due to the over usage and spamming the keywords attribute has been phased out and is no longer relevant. Google doesn't use the "keywords" meta tag in web search ranking. ([googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html](http://googlewebmastercentral.blogspot.se/2009/09/google-does-not-use-keywords-meta-tag.html))

## Text to HTML Ratio

The Text to HTML ratio is **11.94%**

Original content is by far the single most important element to search engines. Low Text to HTML ratio indicates little content for search engines to index. We consider it to be good practice to have a Text to HTML ratio of at least 10% and ideal above 20%

## Keyword Density & Consistency

Consistent	Keywords	% Density	# Count	T Title	D Desc.	H <H>	A ALT	B <b>
✓	zenoti	4.76%	22	1	1	3	3	-
✓	software	3.25%	15	3	1	1	3	-
✗	spa	2.81%	13	1	-	-	3	-
✗	business	2.81%	13	-	1	6	-	-
✗	customers	1.95%	9	-	-	-	3	-
✗	salon	1.73%	8	2	-	-	2	-
✗	spas	1.52%	7	-	2	3	-	-
✗	more	1.52%	7	-	-	3	-	1
✗	salons	1.30%	6	-	2	2	-	-
✗	med	1.30%	6	-	-	1	1	-
-----								
✗	med spa	1.08%	5	-	-	-	-	-
✗	salon software	0.65%	3	2	-	-	-	-
✗	spa software	0.65%	3	1	-	-	-	-
✗	why zenoti	0.65%	3	-	-	1	-	-
✗	see why	0.65%	3	-	-	-	-	-
-----								
✗	brands choose zenoti	0.65%	3	-	-	-	-	-
✗	see why leading	0.65%	3	-	-	-	-	-
✗	self esteem brands	0.43%	2	-	-	-	-	-
✗	spa brands choose	0.43%	2	-	-	-	-	-
✗	hair salon software	0.22%	1	1	-	-	-	-

Keywords density and consistency are notable factors for optimal page SEO. Preferred keywords should have higher keywords density indicating their importance. Optimally, preferred keywords should also be consistently utilized in multiple essential areas of the page such as title, description meta tag, h1 through h6 headings, alt image attributes, backlinks and internal links anchor text. Keyword density of above 5% is a good indication that the word or phrase appears too manytime in the content. ([more information](#))

## Frames

✓ No frames detected. We found 1 inline frame(s).

It is not recommended to use frames or iframes because they can cause problems for search engines. It is best to avoid frames and inline frames whenever possible ([searchenginewatch.com/article/2064573/Search-Engines-and-Frames](https://searchenginewatch.com/article/2064573/Search-Engines-and-Frames)). If frames must be utilized consider <noframes> tag. ([www.w3schools.com/tags/tag\\_noframes.asp](https://www.w3schools.com/tags/tag_noframes.asp)).

## Flash

No flash detected.

Flash and other reach-media technologies should primarily be utilized for decorative purposes. This makes your site more search engine friendly and improves accessibility ([support.google.com/webmasters/bin/answer.py?hl=en&answer=72746#1](https://support.google.com/webmasters/bin/answer.py?hl=en&answer=72746#1)).

## Headings

### ■ 1 <H1>

- Spend more time doing what you love: making people look and feel their best.

### ■ 9 <H2>

- Redefining how you run and grow your business
- Serving the leading spas and salons around the country--and the world!
- 5,000+ salons, spas and med spas trust Zenoti to power their business
- Hesitant about switching systems? Leave it to us!
- We are driven to make you succeed!
- Business
- Company
- SUPPORT
- Follow US

### ■ 8 <H3>

- Elevate the Guest Experience
- Grow your business with A.I.
- Empower Staff & Build Loyalty
- All-In-One Software
- Centralized Management
- Dave Mortensen scaled Anytime Fitness to 4,000+ locations and has ambitious goals for Waxing The City. Hear why Zenoti is the right partner for his business.
- "The alignment, the culture and respect for one another, they have done everything they said they would do, and more."
- "Zenoti has brought many strategic benefits to our business. Most importantly, it helped us to provide a far more seamless experience to our clients."

### ■ 0 <H4>

### ■ 0 <H5>

### ■ 0 <H6>

The <h1> to <h6> tags are used to define HTML headings. The <h1> tag should hold the title describing the content of a specific page therefore only one h1 tag is needed per page. There can be any number of h2 - h6 tags but they should be added in order of importance ([www.w3schools.com/tags/tag\\_hn.asp](http://www.w3schools.com/tags/tag_hn.asp)).

## Doctype

HTML 5

The <!DOCTYPE> declaration tells the web browser about what version of HTML the page is written in. It is good practice to always add the <!DOCTYPE> declaration to the HTML documents, so that the browser knows what type of document to expect. ([www.w3schools.com/tags/tag\\_DOCTYPE.asp](http://www.w3schools.com/tags/tag_DOCTYPE.asp))

## Character Encoding

UTF-8 (Unicode)  
**Covers:** Worldwide

To display an HTML page correctly, the browser must know what character-set to use ([en.wikipedia.org/wiki/Character\\_encodings\\_in\\_HTML](https://en.wikipedia.org/wiki/Character_encodings_in_HTML)).

## Language

Declared Language: en (English)  
Language Attribute: en (English)

The HTML "lang" attributes and language metatag define the base language to be used for displaying text and characters on a Website.  
[www.mcanerin.com/en/articles/meta-language.asp](https://www.mcanerin.com/en/articles/meta-language.asp)

## W3C Markup Validation

Status: **FAILED** [24 errors, 6 warning(s)]

It is good practice to use valid HTML/XHTML markup as it ensures that the search engines can read the website correctly as well as it improves cross browser compatibility ([W3C Markup Validation Service](https://www.w3.org/MarkUpValidationService/)).

## Deprecated HTML elements

Good, no deprecated elements found.

A deprecated element is one that has been outdated by newer constructs. Deprecated elements may become obsolete in future versions of HTML so it is recommended not to use them. ([webdesign.about.com/od/htmltags/a/bltags\\_deprctag.htm](https://webdesign.about.com/od/htmltags/a/bltags_deprctag.htm))

## Nested HTML Tables

Great, no nested tables detected.

In general it is not recommended to use nested tables or to utilize tables for page layout. Nested tables are known to cause performance issues due to increased HTML size and rendering time. It is better to use [CSS layout](#) instead.

## Web Analytics

Yes, we have detected following web analytics tools:

Google™ Analytics

Web Analytics Tools collect and measure information about visitor activity on a website. Well interpreted web traffic data is invaluable in determining a successfully web strategy and assessing the effectiveness of a website. At a minimum, we recommend to utilize at least one web analytics tool.

## robots.txt

Yes, <https://www.zenoti.com/robots.txt>

Your robots.txt file is blocking search engines access to parts of the website.

User-agent: \*

- Allow: /
- Disallow: /\_training/\*
- Disallow: /blog/2012/\*

[See all 25 disallow directives](#)

A robots.txt file restricts access to your site by search engine robots that crawl the web. ([www.robotstxt.org/robotstxt.html](http://www.robotstxt.org/robotstxt.html))

## XML Sitemap

Found following XML sitemap(s):

- <https://www.zenoti.com/sitemap.xml>
- [http://zenoti.com/sitemap\\_index.xml](http://zenoti.com/sitemap_index.xml)
- <http://zenoti.com/sitemap-index.xml>

Sitemaps inform search engines about pages available for crawling. In its simplest form, a Sitemap is an XML file that lists URLs for a site along with additional metadata about each URL. XML sitemap should help search engines to crawl the site more intelligently.

(<http://www.sitemaps.org/protocol.html>)

## Accessibility Check

WCAG 2.0 (AA) Conformance Test: **FAILED** [15 error(s)]

i (italic) element used.

[Line 426, Col 8] <i class="fa fa-play-circle fa-2x " aria-hidden="true"></i>

Replace your i elements with em or strong.

i (italic) element used.

[Line 457, Col 7] <i class="fa fa-play-circle fa-2x " aria-hidden="true"></i>

Replace your i elements with em or strong.

[Subscribe to review all 15 errors](#)

Following Web accessibility standards while developing a website can help users with specific needs, such as visually impaired, motor/mobility, auditory, seizures, as well as cognitively and intellectually impaired disabilities. Some of these fixes include general seo applications like Alt tags, Form labels, fixing empty links and adding alternative text. To read more about accessibility guidelines follow this link [Web Content Accessibility Guidelines \(WCAG\) Overview](#).

Mobile internet usage has been exceeding PC's since 2014 and growing so it is critical for pages to render correctly on mobile devices.

## Mobile Optimization

Google Mobile Page Speed score: **62%** (Average)

Rq. Requests	Hst. Hosts	LT Load time	Html	Img Images	JS JavaScript	CSS	F Flash	O Other	PS Page Size
73	29	3.15s	48.93 KB	490.54 KB	1.91 MB	174.05 KB	0 B	151.91 KB	2.76 MB

Lighthouse Lab Data	Result
✓ Speed Index	<div><div></div></div> 2.2 s
✗ First CPU Idle	<div><div></div></div> 9.6 s
✓ First Contentful Paint	<div><div></div></div> 1.6 s
✓ First Meaningful Paint	<div><div></div></div> 1.6 s
✗ Time to Interactive	<div><div></div></div> 11.1 s

Recommendation	Impact
✓ Avoid landing page redirects	<div><div></div></div> None
✓ Enable compression	<div><div></div></div> None
✓ Leverage browser caching	<div><div></div></div> Low
✓ Reduce server response time	<div><div></div></div> None
✓ Minify CSS	<div><div></div></div> None
✓ Minify HTML	<div><div></div></div> None
✓ Minify JavaScript	<div><div></div></div> None
✗ Eliminate render-blocking JavaScript and CSS in above-the-fold content	<div><div></div></div> Medium
✓ Optimize images	<div><div></div></div> None
✓ Prioritize visible content	<div><div></div></div> None

Mobile PageSpeed analyzes webpages and evaluates its performance while providing suggestions on reducing page load times. Google is incorporating website speed in search ranking (<http://www.matcutts.com/blog/site-speed>)

## Mobile Experience

Mobile User Experience: **92%**(High)

- ✓ **Avoid plugins** - Your page does not appear to use plugins, which would prevent content from being usable on many platforms.
- ✓ **Configure the viewport** - Your page specifies a viewport matching the device's size, which allows it to render properly on all devices.
- ✓ **Size content to viewport** - The contents of your page fit within the viewport.
- ✓ **Size tap targets appropriately** - All of your page's links/buttons are large enough for a user to easily tap on a touchscreen.
- ✓ **Use legible font sizes** - The text on your page is legible.
- ⚠ **Mobile Page Speed** - Your page speed is **average** on mobile devices.

Mobile users have now become a critical part of online visits. Making the website mobile friendly is no longer an option but rather necessity. (<https://developers.google.com/webmasters/smartphone-sites/>)

## Favicon

file: <http://zenoti.com/favicon.ico>

size: 16px by 16px

type: image/x-icon

✗ No hi-resolution (192x192) icon found.

✓ Excellent, apple touch icon found.

The Favicon is a small icon associated with a website. The Favicon is important because it is displayed next to the website's URL in the address bar of the browser as well as in bookmarks and shortcuts. ([en.wikipedia.org/wiki/Favicon](http://en.wikipedia.org/wiki/Favicon))

## Custom 404 Error Page

Yes, custom 404 error page detected.

A404 is a standard http response code for a resource that cannot be located on the server. Webservers usually return a "404 Not Found" error page for non-existing pages. Unfortunately, these default error pages are very generic and a not very user friendly, therefore, using a custom 404 error page is highly recommended.

Process of returning http status code "200 OK" for a non-existent page or redirecting users to another url is called soft 404. Soft 404 errors are problematic for search engines and are not advisable. (<https://support.google.com/webmasters/answer/181708>)

## Printability

Could not locate print-friendly CSS.

Print-friendly pages are designed to fit on an 8.5"x11" or A4 sheet and usually include only the content of the page, along with source information. ([webdesign.about.com/od/printerfriendly/a/aa041403a.htm](http://webdesign.about.com/od/printerfriendly/a/aa041403a.htm))

## W3C CSS Validation

Status: **FAILED** [16 error(s)]

It is recommended to use valid CSS to ensure that the website displays correctly. ([W3C CSS Validation Service](http://W3C CSS Validation Service)).

# Domain Age

Your domain was registered for the first time: 4 years, 6 months, 15 days ago.

Age of the domain is one of the many signals that search engines utilize for ranking. Brand new domains generally have more difficult time to rank high for the first few months. (<http://www.coconutheadphones.com/does-domain-agematter>)

# Domain Expiration

Your domain expires in: 4 years, 5 months, 13 days.

Domain expiration far in to the future is considered a good practice as it promotes confidence in your website, decreases chances of losing domain and in certain cases might help with search engine ranking. (<http://www.hover.com/blog/three-reasons-to-renew-your-domain-names-for-five-years>)

# Links

We found a total of 55 links out of which 13 are duplicate links:

Internal Links: relative	Internal Links: absolute	Ext.External Links: noFollow	Ext.External Links: passing Juice	Other			
37 (67.27%)	12 (21.82%)	0 (0.00%)	6 (10.91%)	0			
Anchor(s)	# Count	Title	URL	L Length	T Target	Rel	Type
 <a href="#">Zenoti Ranked 170th Fastest Growing Company in North America...ore</a>	1	-	SStatic	91	-	-	Abs.Absolute
 <a href="#">Blog</a>	3	-	SStatic	28	-	-	Abs.Absolute
 <a href="#">Resources</a>	1	-	SStatic	11	-	-	Rel.Relative
 <a href="#">Contact Us</a>	2	-	SStatic	16	-	-	Rel.Relative
 <a href="#">IMAGE (Zenoti)</a>	1	-	SStatic	1	-	-	Rel.Relative
 <a href="#">Why Zenoti</a>	2	-	SStatic	16	-	-	Rel.Relative
 <a href="#">Product Tour</a>	2	-	SStatic	18	-	-	Rel.Relative
 <a href="#">Salon Software</a>	2	-	SStatic	31	-	-	Rel.Relative
 <a href="#">Spa Software</a>	2	-	SStatic	29	-	-	Rel.Relative
 <a href="#">Med Spa Software</a>	2	-	SStatic	26	-	-	Rel.Relative
 <a href="#">Customers</a>	2	-	SStatic	15	-	-	Rel.Relative
 <a href="#">Support</a>	1	-	SStatic	13	-	-	Rel.Relative
 <a href="#">Pricing</a>	2	-	SStatic	13	-	-	Rel.Relative
 <a href="#">Request Demo</a>	2	-	SStatic	18	-	-	Rel.Relative
 <a href="#">Watch the video</a>	2	-	SStatic	6	-	-	Rel.Relative

Hyperlinks are an integral part of any website and properly linked content has great impact on the SEO. It is a good practice to keep number of unique links below 100, URLs preferably as short and concise as possible and utilize nofollow attribute to control PageRank flow passed through links.

## Broken Links

Good, No broken links found.

Broken or dead links can negatively impact user experience, search engine crawl rate and website traffic.

## IP Canonicalization

Yes, your site's IP [23.21.106.115](#) redirects to [www.zenoti.com](http://www.zenoti.com).

Some web spiders index websites using IP as well as domain name which can cause duplicate content if there is no IP Canonicalization. ([www.matcutts.com/blog/seo-advice-url-canonicalization](http://www.matcutts.com/blog/seo-advice-url-canonicalization))

## URL Canonicalization

Yes, both the [www.zenoti.com](http://www.zenoti.com) and [zenoti.com](http://zenoti.com) resolve to the same URL.

Domain name with WWW and without can be considered as different pages causing duplicate content for search engines. ([www.matcutts.com/blog/seo-advice-url-canonicalization](http://www.matcutts.com/blog/seo-advice-url-canonicalization))

## Page Speed

Google Page Speed score: **94%**(High)

Rq. Requests	Hst. Hosts	LT Load time	Html	Img Images	JS JavaScript	CSS	F Flash	O Other	PS Page Size
74	29	3.50s	48.93 KB	505.5 KB	1.91 MB	173.7 KB	0 B	195.11 KB	2.81 MB

### Lighthouse Lab Data

### Result

✓ First Contentful Paint	<div><div></div></div>	0.5 s
✓ First Meaningful Paint	<div><div></div></div>	0.5 s
⚠ Time to Interactive	<div><div></div></div>	2.6 s
✓ Speed Index	<div><div></div></div>	1.0 s
✓ First CPU Idle	<div><div></div></div>	2.4 s

### Recommendation

### Impact

✓ Avoid landing page redirects	<div><div></div></div>	None
✓ Enable compression	<div><div></div></div>	Low
⚠ Leverage browser caching	<div><div></div></div>	Medium
✓ Reduce server response time	<div><div></div></div>	None
✓ Minify CSS	<div><div></div></div>	None
✓ Minify HTML	<div><div></div></div>	Low
✓ Minify JavaScript	<div><div></div></div>	Low
✗ Eliminate render-blocking JavaScript and CSS in above-the-fold content	<div><div></div></div>	High
✓ Optimize images	<div><div></div></div>	Low
✓ Prioritize visible content	<div><div></div></div>	None

PageSpeed analyzes webpages and evaluates its performance while providing suggestions on reducing page load times. Google is now incorporating website speed in search ranking (<http://www.matcutts.com/blog/site-speed>)

## Server Information

ISP: Amazon.com, Inc.  
 Server IP: 23.21.106.115  
 Server Location: VIRGINIA, Ashburn

Name Server 1: pdns03.domaincontrol.com (97.74.111.51)  
 Name Server 2: pdns04.domaincontrol.com (173.201.79.51)

Your server's IP address and location have minor impact on the country specific SEO. It is recommend to host the website in the country where the number of vistors is desired to be the highest. Search engines take the geolocation of a server into account. (<http://www.youtube.com/watch?v=hXl23AXlJJU>)

## HTTPS (SSL)

Google™ is now treating HTTPS as a ranking signal. HTTPS is a secure web protocol that allows for encrypted communication between website and the client. HTTPS protocol requires your website to have an SSL certificate, which can be purchased from a Certificate Authority (CA) or SSL vendor. ([http://googleonlinesecurity.blogspot.in/2014/08/https-as-ranking-signal\\_6.html](http://googleonlinesecurity.blogspot.in/2014/08/https-as-ranking-signal_6.html)).

## Safe Browsing

Yes

Safe Browsing is a service provided by Google that enables applications to check URLs against Google's constantly updated lists of suspected phishing and malware pages. (<http://www.google.com/safebrowsing/diagnostic?site=>)

## Spam Blacklist

Good, your IP 23.21.106.115 is not blacklisted.

Spammer directories provide lists of IPs from which spam distribution is reported. Emails sent from the blocked IPs are subject to closer scrutiny and are much less likely to be delivered. For email campaigns it is recommended to utilize professional email services to ensure that your website IP is not blocked. ([www.stopforumspam.com](http://www.stopforumspam.com))

## Email Address Obfuscation

Great, this webpage does not contain email addresses displayed in plain text.

It is recommended to obfuscate email addresses posted in public. This prevents email addresses from being automatically harvested by spam bots which helps to decrease number of unsolicited emails.

## Directory Browsing

Great, your server has directory browsing disabled.

Protect Webserver directories from unwanted browsing. To enhance security, directory browsing should be disabled unless you have a specific reason to enable it. If you enable directory browsing, make sure that you only enable it on the particular directory or directories that you want to share. (<http://technet.microsoft.com/en-us/library/cc731109>)

## Whois Privacy

### Registrant:

Organization: Soham Inc

Address: US

Email: Select Contact Domain Holder link at <https://www.godaddy.com/whois/results.aspx?domain=zenoti.com>

### Administrative Contact:

Email: Select Contact Domain Holder link at <https://www.godaddy.com/whois/results.aspx?domain=zenoti.com>

### Technical Contact:

Email: Select Contact Domain Holder link at <https://www.godaddy.com/whois/results.aspx?domain=zenoti.com>

Whois Privacy is a service that prevents domain owner contact information from being displayed in the publicly available Whois records. This can help to cut down on unwanted spam but utilizing Whois privacy should be evaluated against business model and branding strategy.

## Server Signature

Good, your server does not provide version information.

Attackers can utilize server signature versioning information to their advantage therefore it is recommended to disable it when possible. (Disable server signature for [Apache](#) or [IIS](#)).
